

# Barco UniSee® in large meeting and board rooms

Visualization to stimulate collaboration

## End-user benefits:

- **Improved meeting experience** by simultaneously showing multiple content sources on a large display wall
- **Efficient remote collaboration** by connecting to the Unified Communication system and sharing the view
- **Wired and wireless content sharing** with flexible viewing layout
- Pre-tested and validated system that **fits easily** into any meeting room
- **Central management** of all AV equipment in the room

Visual content plays an essential role in business collaboration. Explaining ideas, exploring opportunities or elaborating figures requires visual assistance to unite all participants and to make sure every meeting delivers real business value. As a pioneer in large screen imaging and wireless collaboration, Barco has the knowledge and expertise to design equipment that helps people visualize their vision and supports collaborative 'brain-sharing' sessions. With the new Barco UniSee® LCD video wall platform, complemented with other solutions in Barco's portfolio, you have all you need to collaborate in a very easy and flexible way, ultimately making your meetings more productive and satisfying.

**BARCO**

# Working together, made more effective

As a leader in large-screen visualization for many years, Barco knows the importance of reliable images that enhance collaboration. They are used for both convincing stakeholders and stimulating interaction. Our portfolio for meeting and board rooms consists of field-proven solutions that were created to interact with, and complement, each other. Barco designs and manufactures these different solutions in-house (in a one-stop-shop set-up) – so we can guarantee the long-term interoperability of all components and you can rely on premium technology you can trust.

## Truly bezel-less large screen visualization

### Barco UniSee® LCD video wall

With a **bezel-less design**, a **barely noticeable inter-screen gap**, **unmatched uniformity** (both inside each tile and across the entire wall), and perfect **color accuracy**, Barco UniSee is the perfect solution for bringing any vision to life.

Adding a light source lifetime of **100,000 hours**, redundancy of critical components, and a **service-friendly** modular approach, Barco UniSee also offers the flexibility needed to display content that has the power to explain, convince, and motivate.

- **Best-in-class and bezel-less viewing experience**, for optimal visual collaboration
- **Perfectly balanced total image**, thanks to Sense X continuous & real-time calibration
- Ready for **all lighting conditions**, thanks to 800 NIT high brightness and low reflection
- Wide viewing angles for **excellent visibility** from any position in the meeting room
- Display **MS-Excel** tables from A to ZZZ
- **Minimal real estate** space needs
- **No noise** (fan-less), adding to a calm and pleasant meeting environment

Boost the value of your Barco UniSee LCD video wall by integrating it with:

- **ClickShare CSE-800**, a powerful wireless presentation and collaboration solution for meeting and board rooms
- **Overture**, for enterprise-wide A/V control and monitoring
- **TransForm NSD**, a secure backbone for video, graphics, web and streaming information distribution
- **Barco CarePacks**, for ultimate peace of mind at all times

## Collaboration made easy

### ClickShare CSE-800

ClickShare has changed the way people collaborate in meetings. The **connect-click-share** principle to put content from any mobile device (laptop, smartphone or tablet) onto the central meeting room screen has grown to be simply a necessity for many business people. The CSE-800 was designed to bring this ClickShare experience to boardrooms, high-end meeting rooms, and conference rooms. Introducing a number of unique features, including **simultaneous sharing of up to 8 people**, automatic & manual moderation, and blackboarding & annotation, the CSE-800 is the most powerful system in the ClickShare family today.

Specifically destined for enterprise rollouts, the CSE-800 offers **enhanced security features**, a wider range of connectivity options – including AirPlay and Google Cast support for non-HDCP content – and central management.

- **Wireless connection** from laptops, smartphones and tablets
- **Push a single button** to share your content
- **Pre-defined layouts** for optimal positioning of content on the central screens
- **Wired connection** to Unified Communication system

## Take control over your meeting rooms

### Overture

Large meeting rooms and boardrooms typically contain a lot of connected devices. In addition to the video wall and collaboration equipment, the climate control equipment, etc. can be controlled remotely as well. Overture, Barco's A/V Control system, allows you to **monitor and control** everything from any browser-enabled device. Because of Overture's HTML5-based interface, this can be **a laptop, a tablet or even a smartphone**.

What's more, this solution can be deployed throughout the organization – so, you get the **same interface look & feel** wherever you go. Because Overture is a software solution, it can be deployed quickly and easily.

- **Software-based** A/V Control solution to get the most value out of your investment in A/V equipment
- **Centralized** A/V set-up and management for your meeting rooms
- **Mobile helpdesk with BYOD** as support staff can use their own device (phone, tablet, PC) to control all of the equipment in the room
- **Monitor** the status of everything
- **Lower total cost of ownership (TCO)** thanks to easy set-up through configuration instead of programming
- **Great and consistent user experience**, creating an even more effective meeting environment
- **User-based security:** if you have the clearances, you have control

## Display with confidence

### TransForm NSD video wall controller

Complementing the ClickShare solution, a TransForm NSD video wall controller can be used to **connect an additional range of applications** to the central meeting room video wall. Adding more freedom in terms of **presets, content positioning and views**, the video wall controller helps you display information just the way you want to.

- Combine **video conferencing, messaging, web-based calling, etc.** with multiple applications on the display wall thanks to the additional pixel space
- Display content of **multiple PCs** on a bigger display wall
- Flexible **views and presets**
- **Extended pixel space**
- **Wired inputs** on the wall

## Peace of mind at any time

### Barco CarePacks

Designed to offer the highest reliability, Barco products deserve the best possible treatment. Our service packages help you **maximize uptime** and complete your total peace of mind. We have different service levels available, depending on your needs. In this way, Barco is always by your side to contribute to your ultimate meeting room experience.

- Warranty extension
- **Hardware & software** service offerings
- Hardware **advanced swap**
- Software **upgrade and update** options
- **On-site** support options

## 100% Barco solutions

Barco has the excellent reputation of being one of the most reliable manufacturers on the market. Not only the quality products, but also Barco's high level of service have convinced numerous professional users, resulting in very high customer loyalty.

Our commitment to quality is coded in our company DNA – and reflected throughout our products. With a portfolio that spans every aspect of professional visualization – from display and structures, to controllers and software platforms – Barco can provide complete end-to-end solutions.
