

# ACC and ACM Integrations

## Access Control That Works Seamlessly with Video Security

Our Access Control Manager (ACM) system integrates with Avigilon Control Center (ACC) video management software to provide you with one simple, powerful and unified security solution to help you focus on what matters most.

Using ACM<sup>TM</sup> and ACC<sup>TM</sup> software, you can instantly verify if a person seen carding in on camera matches the ID photo associated with the access card they're using, then lock or unlock the door right from your ACC dashboard.

From the same screen you can search for that person by using our Identity Search feature.

Using the video from the most recent time they carded in, you can easily use Avigilon Appearance Search<sup>TM</sup> technology to help find their current location on-site or to see where else they have been. It's that simple.

# ACC Software Features

## POWERFUL SEARCH

Avigilon Appearance Search technology sorts through hours of video with ease to quickly locate a specific person or vehicle of interest across an entire facility in near real-time.

## FOCUS OF ATTENTION INTERFACE

A cutting-edge user interface for live video monitoring that leverages AI and video analytics technologies to determine what information is important and should be presented to security operators.

## Combined for a Powerful Security Solution

## IDENTITY SEARCH

Enables fast search for a person of interest using their ACM cardholder information. You can then use Avigilon Appearance Search technology to determine that person's current or previous location on site.

## QUICK ACTION

ACM generated door events allow you to create rule-based actions and notifications for quick on-site responses, including immediate facility lockdown.

# ACM System Features

## 100% BROWSER-BASED SYSTEM

No server or client software installation required, delivering a ready-to-deploy solution that saves you time.

## OPEN-PLATFORM HARDWARE

Integrates with hardware from Mercury Security and HID Global® that scales from just a few readers to larger, more distributed installations.
